## **PRODUCT RANGE & DESCRIPTION**

### **1) CONVEX ‘ALOE VERA’ GEL LUBRICATED CONDOMS (HERBAL CONDOMS)**

We are proud to introduce a new variant in condom industry.

“The all-new **Aloe Vera Gel Lubricated Condoms** for the first time in India manufactured by Convex Latex Pvt. Ltd.”, Pioneer in this category of Condoms.

This invention will change the way of people’s acceptance of condoms in a new fashion as these condoms will provide the natural herbal therapeutic, cosmetic, and moisturizing values of Aloe Vera and the safety and efficacy of Natural Rubber latex Condom.

**‘These condoms deliver intimate lubrication, protection and contraception. They intensify sexual pleasure and provide all the benefits of Aloe Vera’.**

The technology which developed under the R & D facility of Convex Latex Pvt. Ltd. is now available for commercial purpose.

### **ADVANTAGES:**

#### **Aloe Vera Gel Lubricated Condoms**

1. Lubricated condoms with natural Aloe Vera Gel to relieve discomfort during intercourse.
2. Aloe Vera Gel is known to prevent irritation
3. Aloe Vera Gel is known to prevent pain
4. Aloe Vera Gel is known to prevent itching
5. Aloe Vera Gel is known to retain moisture, giving a smooth feeling lubricant that lasts extra-long.
6. These condoms with *Aloe Vera Gel* may be effective for genital herpes

These condoms with Aloe Vera Gel extracts have antibacterial and antifungal activities. *Aloe vera* extracts have been shown to inhibit the growth of fungi that cause tinea.

## **2) CONVEX LUBRICATED CONDOMS WITH VARIOUS FLAVORS:**

The **Natural rubber latex male condom** is used for contraception and for prophylactic purposes.

(To help prevent pregnancy and the transmission of sexually transmitted diseases)

### **DESCRIPTION OF DEVICE**

The condom is made of natural rubber latex sheath, which completely covers the penis with a closely fitted membrane. This condom is almost cylindrical shape in length and includes a reservoir. The surface of the condom is smooth or textured (dotted or ribbed), translucent and may or may not be lubricated with silicone oil. This device is classified as Class IIb as per Rule 15 of annexure-VIII chapter III of MDR 2017/745.

### **DEVICE CHARACTERISTICS**

- 1) All the variants of the device are manufactured using the same raw materials including dressing materials and lubricant, however, excluding colors and flavors which are selectively used as per customers' specifications.
- 2) The basic Production Processes and primary equipment used for the manufacture of each variant of the device are exactly the same.
- 3) All the variants of the device are tested using the same test equipment and test methods depending upon the applicable International Standard.
- 4) To monitor the product characteristics various tests are conducted on the finished Product. "Finished Product Test Methods" have been established containing detailed procedure of testing (for further information please contacts CLPL management). The test methods established are in compliance or exceed the requirements of various International standards applicable.
- 5) Before packing the lubricated with flavor is been injected to the product to ensure smoothness & durability.

## **GENERAL INFORMATION CONCERNING THE MEDICAL DEVICE**

### **DEVICE SPECIFICATIONS**

1. The device is well established and there are several published International and National Standards such as EN / ISO 4074:2015, ASTM D 3492, Standards and WHO 2013 Specifications and Schedule – R of the Drugs and Cosmetics Act, 1940. Convex Latex Pvt. Ltd will manufacture the device according to these standards as per the customer's requirement.
2. Most of the International Standards or Specifications provide details about the properties of the device such as Dimensions, Burst Properties, Tensile Properties, Freedom from Holes and Lubricant Quantity, Labeling and Packaging Specifications or guidelines. In addition to the specifications, these standards also provide inspection level for sampling and AQL for each property individually. The sampling plans adopted by most of the standards are based on ISO 2859-1.
3. Since the International Standards are mostly guidance documents, exact specifications, in particular, dimensions, labeling and packaging requirements depend largely on the customer or buyer's requirements.
